ZMA is a product that is a combination of chelated forms of zinc and magnesium with vitamin B6. Magnesium contributes to the reduction of feelings of fatigue and tiredness, and helps in the normal functioning of muscles and protein synthesis. Vitamin B6 contributes to the maintenance of normal protein and glycogen metabolism. Zinc helps to maintain normal testosterone levels in the blood. ZMA is recommended for athletes as a support for high-performance and recreational training.

COLLAGEN The product contains hydrolysed collagen and has been enriched with vitamin D, vitamin C and calcium – ingredients that support the skeletal system. Vitamin C helps in the proper production of collagen to ensure the proper functioning of skin, bones and cartilage. Regular use of the product for at least 3 months is recommended for best results.
